

# Product Information

## CustomerNet<sup>SM</sup>

Based on over seven years of cumulative experience with both diverse Web technologies and large Government projects, Network Designs, Inc. (NDI) has created *CustomerNet<sup>SM</sup>*, a technology-rich, starter Web site that can help you establish a presence on the Web. *CustomerNet<sup>SM</sup>* offers *ala carte* Web site features. Select your complimentary *five* features to create your Corporate **Internet**, **Extranet**, or **Intranet**. See [www.netdes.com/customernet](http://www.netdes.com/customernet) for an online sample.

### Internet

Who We Are, What We Do, Products, Services, Contacts. Create your Corporate Web Site by bringing together the elements of your story. Your message, the graphics that help to deliver that message, and the technological features that can best engage your viewer converge in your Web site. With *CustomerNet<sup>SM</sup>*, begin with the basics—*five* complimentary Web site features of your choice. Then enhance your site with features that allow you to interact with your current, new, and potential customers.

### Extranet

As an Extranet, *CustomerNet<sup>SM</sup>* can function as your single portal to all communications, documents, diagrams, plans, schedules, timelines, trouble tickets, and accounting information that pertain to a project you are conducting with a second party outside of your organization. Select your *five* complimentary *CustomerNet<sup>SM</sup>* features to ensure clear communications on critical projects.

### Intranet

Your corporate intranet is created with the understanding that your employees' time is valuable. Corporate materials are brought to the surface for the user so that time is not wasted in seeking out or recreating information. The more powerful the corporate intranet, the more evolved its capabilities, offering a number of "interactive" features that save time for a person. Users can accomplish certain tasks online, such as fill out forms, download data, or upload data to the intranet, thereby sharing and adding to a single body of knowledge. Select *five* complimentary *CustomerNet<sup>SM</sup>* features to begin to create your corporate intranet.
